

1

Put a folded piece of rope under a metal bar

2

Make a fold on the left side of the rope

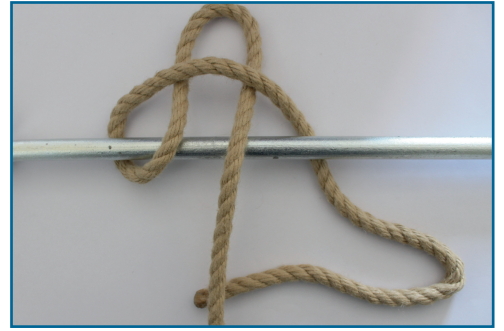

3

Pull the second fold over the bar and through the first fold

4

Make a fold on the right side of the rope

5

Pull it through the hole created in Step 3

6

Pull tight to finish the knot

Well Done!

The **HIGHWAYMAN'S HITCH** is used to temporarily secure a load that will need to be released easily
